COMPUTER SCIENCE ENGINEER

Experienced leader in software development with expertise in deep technology and a track record of building projects from the ground up across startups.

Requirement Analysis

Software Architecting

Robust and Modular Coding

Lead Technical Team

Reporting and Documentation

SYNOPSIS

- Over **7+ years** of experience in software development experience, specializing in high-performance systems.
- Expert in web development using **JavaScript, NodeJS, Python, MongoDB, MySQL, Kafka, Docker, Kubernetes, and AWS cloud**.
- Proficient in **Data Structures, Algorithms, and System Design**, enabling the development of complex and modular systems.
- Known for writing **clean code** that is easy to maintain and reduces long-term engineering costs.
- Guided and empowered a team of **8 developers**, fostering a cooperative atmosphere that resulted in a 25% increase in feature delivery and a 30% decrease in post-release issues.
- Committed to continuous learning, integrating **5+ new technologies** into projects **annually**.
- Enjoys exploring digital literature, with a personal collection of over 100 titles on Kindle.

LINKEDIN RECOMMENDATIONS

- I have worked with Saket across multiple product initiatives and highly recommend him as a **diligent, hardworking** developer who also cares about user experience besides good code. He takes **ownership** of his work and ensure **on-time delivery** while ensuring **quality**. All the best to him for now and future – **Surbhi Lohia – Product Manager @ ET Money | Times Internet**
- Saket is a very **hardworking** and **talented** individual with a very **deep understanding** of programming/software technologies. We've worked on a few projects together and I must say that his vast knowledge has surely helped us **overcome** several **obstacles**. Apart from this, he's a **great mentor** and **co-worker**. – **Bhawesh Chandola – Software Engineer @ Amazon**
- I rarely come across real talents who stand out like Saket. I had the pleasure of working with Saket for two years at Biz2Credit. Saket **ability to handle multiple projects** was unlike any I've seen before and made a dramatic **increase in the productivity** level of the company. No matter how tense a meeting, Saket made sure **everyone left with a smile**. As a team member or a leader, Saket was one of the best employees I have worked with. No doubt, he is a gifted negotiator with a rare combination of **patience, spunk, and research skills**. – **Naman Garg – Senior QA Engineer @ Biz2Credit**

SKILLS SNAPSHOT

Programming	Language & Frameworks	Database	Other IT Skills
<ul style="list-style-type: none">• Data Structure & Algorithms, Design Patterns, System Design (Low-Level & High Level),	<ul style="list-style-type: none">• Python, JavaScript, NodeJS, Flask & React	<ul style="list-style-type: none">• Postgres / MySQL, MongoDB, Redis, SQS,	<ul style="list-style-type: none">• AWS Cloud Computing, Microservices, Docker

PROFESSIONAL DEGREE, TRAINING & EDUCATION

B.Tech. in Computer Science, UPTU (4th year dropout)

Higher Senior Secondary, Bihar State Board, 2012	Senior Secondary, CBSE, 2008
--	------------------------------

Online Courses / Certifications

MERN Stack, Elastic, Docker Udemy	Python, JavaScript, NodeJS, Official Doc
Packt, Apress and O'Reilly books	Discrete Math, Data Structure & Algorithms, NPTEL

WORK EXPERIENCE

Gromo | Vittrak Technologies Pvt Ltd | Gurugram, India

Lead Engineer - Backend

January 2023 – Present

- Created a centralized identity management system for over **4 million users**, featuring multi-tenant access, hierarchical user management, and secure login with OTP and password options
- Developed a software application to collect and process insurance policy PDFs from insurers daily, **reducing** the business processing time from **15 days to just 24 hours**. This streamlined system automatically downloads policy documents, extracts necessary data, and integrates this information into a CRM
- Created a task scheduler library using SQS available on NPM, improving unified queue consumers across AWS SQS. [Click to view on NPM](#)
- Engineered a business-to-business portal from that manages tens of thousands of leads each month. This portal also handles employee management, lead tracking, and generates reports.
- Migrated traditional EC2 servers to **Docker** Kubernetes, achieving a **30% AWS cloud cost reduction** and enhanced system uptime
- Reviewed over **25,000 lines of code** of 8 engineers in the past year, enhancing code quality and system reliability.
- Tech Stack:** NodeJS, NestJS, Python, Typescript, AWS, MySQL, React JS

Times Internet Limited | ET Money | Gurugram, India

Software Engineer II

September 2020 – December 2022

- Enhanced user experience by **reducing** mutual funds **page load times by 70%** through code refinement, image optimization, and caching strategies, while also boosting JavaScript performance and streamlining future development by refactoring code.
- Designed advanced mutual fund and stock information pages with comprehensive filters, enhancing the investment experience for 15% of web customers, increasing app downloads by 20%, and significantly boosting Asset Under Management (AUM) [Click and Explore Mutual Fund](#)
- Programmed a **suite of financial calculators** for SIP, CAGR, Sukanya Samriddhi, Income Tax, and Rent Receipts, other user financial planning tools. This project boosted SEO performance, attracting **thousands of new customers** and contributing to business growth
- Created a custom CMS for static content, which reduced server requests by 30% and improved site speed by 40%, leading to enhanced user engagement and lower bounce rates
- Earned **Exceeds Expectations** remark in performance appraisal cycle
- Tech Stack:** JAVA, JSP, JavaScript, jQuery and React JS

Biz2Credit Infoservices Pvt. Ltd. (Fintech MNC) – Full Time

Software Engineer

June 2018 – July 2020

- Developed a secure SaaS platform for loan origination used by major global banks including **ICICI, HSBC, and Standard Chartered**, with data security and transaction safety. Visit <https://www.biz2x.com/india/>
- Engineered a **Bank Statement Analyzer** and Credit Bureau Module, which streamlined financial document analysis.
- Architected the **Biz2X Loan Management System**, automating post-loan processes with feature like generating **Repayment Schedule** of loan application, realizing **Accrual** at bank's end, **Ledger** management and **Accounting**
- Implemented a **Criteria Assessment calculation tool** in Python, aiding in more accurate loan decision-making
- Conducted over **100 technical and behavioral interviews**, leading to the successful hiring of 20 top-tier tech talents, boosting team productivity by 25% within 6 months
- Programmed a Node webhook for Standard Chartered Marketplace to notify clients of important events, boosting engagement with real-time updates
- Led a team of **8 software developers**, including full stack and frontend developers, starting in June 2019
- Tech Stack:** NodeJS, Python, Flask, Django, Postgres, MongoDB, React – Redux, Docker

ITH Destination Pvt. Ltd. – Full Time

Senior PHP Developer

April 2017 – May 2018

- Built a travel itinerary builder that **saved the sales team 16 hours per week** by automating scheduling tasks.

- Built a **CRM system from scratch**, for sales tracking and operational efficiency, and enabling sales executives to monitor tasks and customer follow-ups
- **Led a team of six software developers**, guiding project segmentation and distribution to enhance workflows and team performance
